> PROFESSIONAL EXPERIENCE

Frontend Software Engineer | VeendHQ | Lagos, NG

JULY 2021 - PRESENT

- Responsible for all frontend related engineering projects at VeendHQ including, but not limited to, the official website, a loan application webapp and a dedicated lending dashboard.
- Designed and managed optimised frontend development time by building the activity system UI using modular, reusable and responsive components created with Reactjs and Typescript.
- Facilitated agile development methodology by leading standups, delegating and completing tickets managed and tracked using Trello to fulfill expectations during my time as interim team lead.
- Responsible for designing user experience flowcharts and wireframes for upcoming projects and/or features,

Frontend Software Engineer | Enye Cohort 5 | Lagos, NG

FEBRUARY 2021 - MAY 2021

- Led an Agile team of 3 engineers to develop a fully functional MVP for Stokkpile, a proptech startup that allows customers buy and store building materials in smaller quantities, on Android and iOS devices using React Native with TypeScript best practices, Firebase Authentication, AWS Lambda functions and MongoDB to ensure optimum performance and scalability.
- Optimised frontend development time by over 65% by building the activity system UI using modular, reusable and responsive components created with React Native and Typescript.
- Facilitated agile development methodology by leading standups, delegating and completing 100+ tasks managed and tracked using Notion to fulfill client satisfaction in the technical implementation of Stokkpile.
- Followed User Experience best practices to design high fidelity UI mockups (25+ screens and user flow) using Figma resulting in an aesthetically pleasing and seamless in-app experience.

Frontend Software Engineer | HNG i7 | Lagos, NG

JUNE 2020 - AUGUST 2020

- Led a team of 4 engineers to implement the technical requirements of CustomerPayMe web, an on-demand, scalable ledger solution for small and medium sized businesses globally using semantic HTML5, Javascript and CSS 3 best practices.
 - Delegated and solved 50+ tasks to fulfill the requirements of CustomerPayMe with 90% client satisfaction.
 - Generated \$15 - \$35 worth of revenue by developing complete responsive UI themes sold on themeforest.com using HTML5, Bootstrap4, JavaScript and CSS3.
-

> EDUCATION

University of Lagos, BSc. Geography and Planning

NOVEMBER 2018

> RECENT PROJECTS

Frontend Software Engineer | Cinify EMR | React-Native

SEPTEMBER 2021 - JANUARY 2022

- Worked on an agile engineering team to build Clinify's client app and Admin dashboard using React Native, Apollo GraphQL and Typescript.
- I was responsible for maintaining a consistent user interface design across the entire mobile application, including but not limited to responsive styling across devices and ensuring user experience remains consistent.
- I also utilized and created custom hooks to cater for memory leaks and ensure seamless state management across the whole application.

Frontend Software Engineer | Tweetplug | Code

FEBRUARY 2020 - JULY 2020

- Worked on a 2-man engineering team to build Tweetplug's client website and Admin dashboard using HTML5, CSS, Nodejs, Express, Ejs and JavaScript resulting in average 60+ user activity per month.
- Deployed the live codebase onto NameCheap servers and managed the codebase until July 2020.

UI Designer | KazMpire Enterprises | Design

JULY 2019 - MARCH 2020

- Created and designed interactive desktop and mobile UI/UX mockups (30+ screens) for kazmpire.com using Adobe XD while keeping to UI/UX best practices.
- Designed 2 - 3 unique promotional posters for weekly advertisement resulting in a customer conversion and retention rate of average 55% monthly.
