PROFILE

Courteous, tenacious and enthusiastic, I am interested in software design & development and most things in its orbit. My fascination for web programming, specifically UI/UX development and design began during my time at INITS Ltd. as a content writer on a quiz app. I am keen on broadening my knowledge and skills in this field and for this reason, I am searching for a company willing to offer me a placement among their developers. In return, I will offer my full commitment, and be a pleasant and friendly addition to your team.
